Subject: Assembly Bill 920 and Net Energy Metering (NEM)

Dear Solar Customer,

In accordance with AB 920, you are eligible to receive compensation for net surplus electricity generated from your solar system. However, you must elect to participate in the compensation program by completing and returning the attached NEM Surplus Electricity Selection Form (available at [www.ci.healdsburg.ca.us](http://www.ci.healdsburg.ca.us)). If you do not return the attached form, the City will not be obligated to compensate or issue any bill credit to you, and the City will retain any net surplus electricity generated during your 12-month true-up period.

Solar customers have the following options for compensation:

- 1) Choose to receive compensation (check the “I am interested in receiving compensation” box on the selection form).
- 2) Choose to apply any net surplus electricity as a future credit (check the “I elect to be allowed to apply any Net Surplus Electricity as a future credit” box on the selection form).
- 3) Choose not to receive compensation (check the “I am not interested in participating in the program” box on the selection form).

Healdsburg’s City Council has set the compensation rate for surplus energy at \$0.082 (see resolution 27-2012). The rate compensates eligible customers for net surplus electricity and the renewable attributes of the energy.

If you have questions regarding your options, please feel free to contact the City’s Utility Billing department at (707) 431-3312.

Very truly yours,

Katherine Ahlborn  
Utility Billing Supervisor  
City of Healdsburg
